HKC Residential Security

The smart choice for professional Installers

HKC

ASSA ABLOY

Experience a safer
and more open world

Why HKC?

HKC App

- Set / Unset Alarm
- Push & Audible Notifications
- Receive / Request images from Motion Sensors (PIR) Camera
- Virtual Keypad
- Check Logs
- Control lights / heating / cctv
- Integrate with cctv system

HKC Alarm

- Easy to Use
- Voice Annunciation for all commands
- LCD Display
- Part Set capability – protects while in the property
- No Wires, No Hassle Install
- Range of Life Safety Devices
- RF FOB for Duress and easy set/unset

Types of Protection available and detector functions

HKC manufacture a complete range of intrusion devices that detect attempted or actual intrusion. Devices typically fall into two categories – Perimeter such as Contact or Shock sensors which detect attempted or forced entry on a door or window and Trap Protection such as motion sensor (PIR) which will detect the presence of an intruder.

Perimeter Protection is where a building is protected with devices located on external doors and windows.

Trap Protection. This type of protection comprises devices internal to the building such as motion detectors and is more suitable to a building which is unoccupied while the system is armed.

The ideal protection is a combination of both whereby the perimeter of the property is protected to ensure early detection and warning of intrusion attempts.

Key Residential Devices

HKC provide both wired and wireless detection devices. Windows and doors can be protected with inertia shock or magnetic contact sensors and can be used in conjunction with motion, dual tec detectors or PIR camera for internal protection. For health and safety HKC provide panic buttons, smoke, carbon monoxide and heat detectors and a range of sounders.

Panels to suit all properties

HKC design panels for both commercial and residential properties. The Quantum 70 is a 70-zone wireless panel suitable for SME and smaller properties while the SW 10270 with capability of over 200 zones is ideal for larger properties .

Quantum 70

HKC SecureComm Connected World

The HKC SecureComm App allows complete control of the system from any location. Arm or Disarm the System, turn lights and heating on, open gates or simply check the log to see the event history. Once connected to the SecureComm Cloud the installer can carry out remote maintenance and change device settings without leaving the office.

SecureComm Cloud

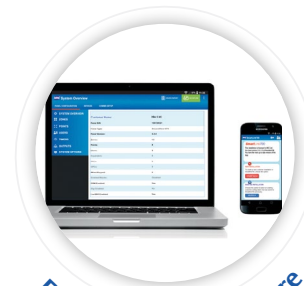

- Cloud developed and managed in-house
- Easy Connectivity using HKC Comms Modules
- Engineer App and Software facilitate full upload & download
- Manage Site Connectivity (SecureComm Admin Tool)
- Manage devices remotely
- Upgrade panels and detectors software
- Remote Maintenance
- Firmware Upgrades

Control CCTV, Gates & Heating

Residential

Connected Devices

Simple control using the HKC connected device technology.
Control lights, heating, gates and view cctv wirelessly.

Which Detector?

Outlined below the functions of each detector to help and guide system design.

Contact Sensor

Detects the opening of door / window.

Inertia / Shock

Detects forced opening / glass breaking.

PIR Motion

Detects movement.

Dual Tech

Detects movement using dual technologies.

PIR Camera

Detects movement and sends picture to app.

Smoke Detector

Detects & sounds when smoke is detected.

Heat Detector

Detects & sounds when heat is detected.

Carbon Monoxide

Detects & sounds when gas is detected.

Panic Button

In the event of duress, when pressed alarm activates.

Proximity Tag

Used to arm / disarm system.

Key Fob

Used to arm / disarm system and can also act as panic button.

Internal Siren

Sounds in the event of activation.

External Siren

Sounds & flashes in the event of activation.

Burglary Prevention Advice

Front Door

TOP 5 TIPS

- Secure all doors and windows. 1 in 5 burglars gain access through an unsecured door or window
- Light up your home, use HKC connected devices when out.
- Use your alarm even when home.
- Store keys safely and away from windows & letterboxes.
- Record details of valuables and don't keep large cash amounts at home.

ASSA ABLOY is the global leader in door opening solutions,dedicated to satisfying end-user needs for security, safety and convenience.
